

## Product Highlights

- Rated to 200°C Class H
- Grade A (7,000)
- MIL-I-3190/5 - QPL
- Excellent low temperature flexibility
- Available in AWG sizes #24 through 1" I.D.
- Available in natural and black

# Ben-Har™ 1062

## High Strength, Extremely Tough Silicone Resin Coated Fiberglass Sleeving

Bentley-Harris® Ben-Har 1062 is a 200°C sleeving with a flexible proprietary silicone resin coating. Ben-Har 1062 will conform to bends required in complex wiring systems, including 180° bends, without cracking or crazing even when held in such positions permanently at the rated temperature. Its great flexibility permits production of continuous length runs in sizes up to and including 1" I.D. Other characteristics include excellent push-back properties and end splitting resistance.
